

Auto-Wrap® Syringe Labeling System

Disposable Materials Sample Sheet

Medical Packaging Inc., LLC (MPI)'s Auto-Wrap® Syringe Labeling System requires any style Auto-Wrap® Label (shown below) and transfer ribbon to print, wrap and affix labels to a syringe.

Three (3) different styles of labels and five (5) different colored labels are available to meet the specific syringe labeling needs of your facility. Label print area ranges from 1.0" to 1.5".

FLAGGED LABELS

The top clear portion of the label is wrapped around the syringe with semi-permanent adhesive. The white/printed portion extends and hangs from the syringe and the area is deadened to reduce tackiness.

TACKED LABEL

The top clear portion of the label is wrapped around the syringe with semi-permanent adhesive. The white/printed portion has a clear adhesive area which will keep the label tacked to the syringe. This will allow for better storage and for the label to be untacked from the syringe for viewing.

Please see reverse side for a list of the MPI disposable materials available for use with this labeling system.
